Note: <i>The Agency Which Determined the Violation and Violation Responsible Agency must be the same unless a referral (enforcement action 810 or 820) has been issued. Only the agency listed in the Violation Responsible Agency field will be allowed to update the violation's Actual Return to Compliance Date and Return to Compliance Qualifier type.</i>

Violation Type	VIOL_TYPE	CE4-040, CE4-130	Code indicating the specific area of the RCRA portions of the Federal Code of Regulations covered by the evaluation and/or found to be in violation with RCRA regulations or statutes. Areas generally correspond to subparts of CFR 40: Part 262 for generators, 263 for transporters, and 264/265 for TSDs. [see nationally-defined values] Note: <i>Implementers who are broader-in-scope will be able to use Violation Type 'XXS'. Additional clarification should be addressed through the use of the Citation field.</i>
Former Citation	FORMER_CITATION		The citation from Federal or State regulations or statutes that specifies a violation or pending violation in sufficient detail to distinguish it from other violations intended to be addressed separately by other enforcement actions. These regulation numbers or citations can be found in the Code of Federal Regulations or in State regulation publications. They should be part of the inspection or evaluation report prepared by the person identifying the violation. New violations do not supersede resolved violations of the same regulation. Note: <i>This field was created to maintain historical citation data entered into RCRAInfo prior to Version 3. This data cannot be changed (added, updated, or deleted).</i>
Date Violation Was Determined	DETERMINED_DATE	CE4-050	Date that a determination is made that the violation exists. This is not necessarily the same date as the date of the inspection or evaluation. The handler will be considered to be out-of-full-physical-compliance until the Actual Returned to Compliance Date has been determined. Actual Return to Compliance Date does not necessarily mean that all enforcement actions are completed for this violation. For violations of omission (such as not manifesting a load of waste), the Actual Return to Compliance Date is the date of a written commitment by the handler to comply in the future or the day of conviction in a criminal action. Penalty payment is not a condition of full physical compliance; however if non-payment is the only violation then the Actual Return to Compliance Date is the date that payment is received. Note: <i>Because of the verification requirement, Actual Return to Compliance Date will rarely match Scheduled Compliance Date. Where orders address multiple violations, program implementers may not verify physical compliance for all violations until the handler indicates that all violations have been corrected.</i>
Return to Compliance Qualifier	RTC_QUALIFIER	CE4-070, CE4-080, CE4-090	Code Indicating the conditions under which actual compliance was observed. Note: <i>The value "O" (observed) was used for ALL RTC violations brought forward from RCRIS.</i>
